- * Manage Labels for Files: You can easily add labels for files by drag and drop the file icons to the desired folders. Then you can assign users to which folders they should appear in, automatically label those folders, and even remove labels from them.
- * Star Files: You can add or remove stars for files on the fly by the original [Mark or Star] and [Unmark or Star] buttons.
- * Adjust Font Size: You can adjust the font size for labels, stars, folders, and file details.
- * Auto Sync: You can easily synchronize your data between devices by using the auto sync function.
- * Search Documents: You can search for and find files, documents, and folders by using the search function.
- * Useful Short Cuts: You can use the original [Ctrl]+[F] to open the search function, or use [Ctrl]+[F] to open the [Quick Preview] function.
- * Quick Preview: You can preview a file in a separate window by using [Ctrl]+[J]. Even if you do not open a file, you can preview it straight away.
- * Sort By Labels: You can sort files based on labels so that you can easily find files by looking through the folders. You can also search for specific files or folders by their labels.
- * Sort By Notes: You can sort files by adding or removing notes to them, so that you can easily find files with specific notes.
- * Sort By Stars: You can also sort files based on the number of stars by using the stars function.
- * Labels for Folders: You can easily label your folders by dragging and dropping the folder icon to the desired folders and adding notes. This way you can check the contents of your folders in a good order.
- * Put Files in Folders: You can also put files in your
