We are pleased to announce the December 2021 Netsparker Standard 6.3 update. With this release, we continue to improve our multiframe service to provide a better performance solution. Compared to previous versions, we improve performance by 25%. Our new website contains an improved interface and we provide a new set of developer tools. All these improvements allow us to provide our customers with an even more efficient service.

Some of the biggest changes in this release include new features such as
