A keyboard macro recorder. Allows to create macros of your keystrokes, specify actions after each keystroke, run script and change the keyboard layout. Features list: Captures macro keys typing on the keyboard, click and text objects (images, mouse clicks, windows, menu commands, etc.) Recording, macro manager, user interface layout editor, custom shortcuts, auto-completion, data transfer to clipboard, import and export scripts and templates for data, conversion scripts and converters, time and duration of macros, support for custom windows, mouse, screen and key combinations, save in common formats, import and export data in common format, backup and restore, export and import data with other software, schedule of execution, support for customized programs. Operating system: Windows. I tried it and it worked like a charm. The demo version didn't have this but in my opinion it is not important. I recommend it for everyone who wants to simplify their work. NOTHING MORE TO SAY!!! Wow, what can I say! I am so glad I was given this software to test, to be honest. I have been looking for a good search engine for a long time, but it has always been hard to find. This is now my absolute favourite! No virus, not a single minute of bugs, no worries, nothing. One is more powerful than the other. Why? because the "app" lets you do all the shortcut commands, and the "shortcut" only does a single command. I say this is because the shortcut takes a longer time to load. This is the best one ever! I don't know why but after using this software, all my problems disappeared. I have no intention to uninstall it. It is a very good software that provides you a lot of functions. It can easily handle all the files and folders with such a beautiful appearance. It has lots of functions and abilities. It's a great and powerful software. Best recording software. Wow!! I am speechless. This is the best recording software I have ever used. It's a product with a huge community of users, plenty of functions and options, and it was tested on different computers and operating systems. It's really a great and reliable program. I love this software. It's so helpful. It's simple, easy to use, with many functions, and easy to find what you need. It is one of the most promising and interesting software I have ever 1d6a3396d6
